CAREER OBJECTIVE

To leverage my years of experience as a Javascript developer using React to contribute impactful solutions and drive success with a like-minded team. Committed to delivering efficient and user-centric solutions through listening and continuous learning.

WORK EXPERIENCE

Full-Stack Developer

Projects

October 2022 - Present / Remote

- **OpenAI Article Summarizer**- A modern responsive application that allows users to instantly extract and summarize articles using OpenAI's ChatGPT 4.0! Just simply copy & paste a url and let AI do the rest of the work! For convenience The app will save submitted articles to quickly access previous links. **STACK: REACT, REDUX, and TAILWIND CSS.**
- **YouTube 2.0**- A familiar application to many people, this is a clone of Youtube! Just like the original users will be able to watch, search, and save their favorite videos! **STACK: REACT and MATERIAL UI**
- **Car Showcase**- This car showcase platform is a state of the art application built for car and UI/UX enthusiasts. The app is fully web and mobile responsive, features modals displaying car details, and implements advanced search and filter functionality.
  STACK: TYPESCRIPT, NEXT.js, TAILWIND CSS and HEADLESS UI
- **E-commerce Store**- A cutting edge e-commerce application that makes shopping fun! Built with modern design, animations and advanced cart functionalitIes. Integrated with Stripe to handle payments and the entire checkout process. **STACK: NEXT.js**
- **Face Recognition App**- Create an account, log in, enter an image url and this app will detect any faces in the image! Responsive CSS and vector graphics implemented to dynamically draw boxes around faces in the image. Results will be stored on a database for each user.
  STACK: REACT, REDUX, NODE, EXPRESS and PostgreSQL
